

LAWN & ORNAMENTAL SERVICES, INC.

"DOESN'T YOUR LAWN DESERVE THE ROYAL TREATMENT?"

SOLUTIONS, LLC

"If you have a pest problem, we have the Remedy"

FEBRUARY MONTHLY TECHNICIAN NOTES

The treatment this month consists of a balanced ratio of fertilizer with a high rate of micronutrients, to help stimulate root growth to repair any stressed areas resulting from frost, freeze or fungus, along with a surface insecticide. Weed control will only be used as needed. We will also treat for any active fungus seen at time of service. As always please water in 24 to 48 hours after treatment, 45 to 60 minutes per area. If it rains 15 minutes or later after the application, then no need to water. It is that time of year to start watering twice a week when temps stay in the upper 70 to 80 degrees, 45 to 60 minutes per area. Longer in full sun areas. Ideally we prefer you water closer to sunrise to avoid wet conditions during the cool nights.

Unfortunately, as many of you have experienced recently that during the cooler times of the year many of you may have disease/fungus such as brown patch/large patch, and or cold/frost injured areas. This December with colder temperatures than what we have experienced in the last few years there is more fungus/cold related injury than many of you have ever experienced. Keep in mind this can occur at any time due to environmental conditions and will probably reoccur each year around the fall. With any fungus/cold injury, these areas will take time to recover, and you won't see that start to occur until the lawn starts to grow again. With each mowing it will cut off the damaged leaf blades as it grows, we also recommend putting down some sand or top soil in the bare/injured areas to help them recover. Remember also turf grass only spreads 15" to 24" per year, except Zoysia and Centipede which only spread 6" to 12" per year so filling in the bare areas or injured areas is beneficial to help in keeping the weeds from trying to fill in those areas.

We recently have been introduced to a new company that offers Aeration, Top Dressing, and misc. services that your maintenance company may not provide. The name is Top Dressed Lawns. They can help restore the "Essence of the Life" with organic nutrients through top dressing that will help also to build a strong root system that retains nutrients & water efficiently. If interested their website is www.Topdressedlawns.com.

Remember Royal Green has the Remedy for all of your lawn care, tree/shrub, rodent, bed bug, pest control and termite needs. Contact Phil with Remedy Pest Solutions directly at 904-743-2403 for any of your pest control, rodent, bed bug, or termite inquiries.
