

LAWN & ORNAMENTAL SERVICES, INC.

"DOESN'T YOUR LAWN DESERVE THE ROYAL TREATMENT?"

REMEDY PEST SOLUTIONS, LLC

"If you have a pest problem, we have the Remedy"

February Technician Notes

During winter months soil temperatures are lower and there is less sunlight. This is what causes lawns to go dormant. Even though the blades aren't growing or greening the root system is still active which is why watering your lawn consistently is extremely important. Roots still require water during these months or they will die creating dead spots when the lawn greens up in the spring.

Watering twice a week 35 minutes per zone is recommended. However if the temperatures rise to mid 70's or even 80's then 40 minutes zone is recommended. There is no need to cut/mow the lawn since it is not growing, and cutting St. Augustine lawns low now will allow colder air to reach the soil and possibly damage the root system.

This month's application will be a potassium fertilizer to strengthen the root system to limit damage from any severe cold. A micronutrient package to get the soil nourished for spring. Insecticide, a post emergent herbicide for any existing weeds.

Please remember you will not get the full benefit of our materials if you are not watering properly. The materials have to be watered in and the lawn needs to continue to be properly irrigated in order to get the maximum benefits that is how they are designed.

As always, Remember Royal Green has the Remedy for all of your lawn care, tree/shrub, rodent, pest control and termite needs. We also can do WDO Inspections/Reports for your Real Estate needs. Contact Phil with Remedy Pest Solutions at 904-743-2403. With all the rainfall don't forget to ask about our monthly Mosquito Control from March through October with Remedy.....
