"DOESN'T YOUR LAWN DESERVE THE ROYAL TREATMENT?"

SOLUTIONS, LLC

"If you have a pest problem, we have the Remedy"

### AUGUST TECHNICIAN NOTES

We know several areas are receiving rain, however it has been scattered and with the temperatures as hot as they have been it is not enough to back off on your watering. You still need to be watering 3 times per week for 60 minutes per zone. Watering 15 minutes per zone 3 times a week is not the same, it's the depth of water getting not the amount of times you are watering. If you notice areas that are light in color or thinning please check your irrigation coverage by placing a container in that area (EX: tuna can, cat food can) and making sure an inch of water is actually getting to that area. Thinning is an indication that the roots have died or are dying in those areas. As noted in previous letters to get the full results from the materials you have to water them in and they have to be reaching the root system.

This month's application will be fertilizers, both contact and systemic insecticides. It is too hot to apply any herbicides (weed control) per label restrictions without damaging the lawn. And remember to stay off lawn until application is dry this includes pets. Usually around 30-60 minutes.

If you have exposed roots, please apply top soil or sand to cover the roots and protect them from the elements. This will aid in the recovery process of the turf.

Always remember if you see brown areas and they have been treated it will still take time to recover the brown areas will not go away overnight. The time of recovery will depend on the amount of damaged area. Some lawns will take longer to recover. Lawn maintenance is vital. St. Augustine blades should be left at 4 inches after cutting during the summer.

We are asking all customers to reach out to us and let us know how your technician is doing. We are doing an internal contest. For helping us out with this we will credit your account \$3.00. Thank you in advance for your assistance.

As always, Remember Royal Green has the Remedy for all of your lawn care, tree/shrub, rodent, pest control and termite needs. We also can do WDO Inspections/Reports for your Real Estate needs. Contact Phil with Remedy Pest Solutions at 904-743-2403.
